Institution: Hunan University of Science and Technology

On behalf of the Organizing Committee, it is my great pleasure to formally invite you to the 15th International Conference on the Technology of Plasticity (ICTP 2026), which will be held at "Jeju Shinhwa World" on Jeju Island, Korea, from October 11 to 16, 2026.

Founded in 1984 and widely recognized as the 'Metal Forming Olympics,' ICTP is the premier international forum for academic experts and industrial engineers to discuss innovations in plasticity technology.

I am very pleased to inform you that the following abstract was accepted for an oral presentation at ICTP2026.

Title: BIOINSPIRED WAVY INTERLOCKING INTERFACE WITH A MINERAL-COLLAGEN FIBER-LIKE STRUCTURE FOR STRENGTHENING AI LAMINATED SHEETS

Authors: Yufeng Song, Yuqiang Chen, Xuefeng Ding

I look forward to welcoming you to Jeju Island this October for a productive and inspiring conference.

With best regards,

Jeong Whan Yoon

Chair, ICTP 2026

President, Korean Society for Technology of Plasticity (KSTP)

Professor of Mechanical Engineering, KAIST
